

Ashish Sahu

GenAI Quality Architect | Lead SDET | Engineering AI-Driven STLC | 8+ Yrs Google Projects
Bengaluru, India | (+91) 9178038828 | [Email](#) | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Yantra - My AI Digital Twin](#)

PROFESSIONAL SUMMARY

GenAI Quality Architect & Lead SDET with 13+ years of engineering experience, including 8+ years leading enterprise-scale Google projects. Evolving from core backend development, I specialize in GenAI implementation—architecting stateful, multi-agent AI workflows (via LangGraph/LangChain) across OpenAI, Google Vertex AI, and Anthropic Claude. Proven track record of engineering self-correcting AI agents, custom tools, and MCPs to resolve critical project impasses and drive massive efficiency gains across the Software Testing Life Cycle (STLC).

TECHNICAL EXPERTISE

- **Agentic AI & Orchestration:** Google ADK, LangGraph, LangChain, EPAM ELITEA, Stateful Multi-Agent Workflows, Human-in-the-Loop (HITL), RAG, Vector DB, MCP, Prompt Engineering.
 - **Enterprise & Open-Weight LLMs:** Anthropic Claude (API & Claude Code), OpenAI (GPT-4o), Google Gemini (Vertex AI), Azure OpenAI, AWS Bedrock, DeepSeek-R1, Meta Llama 3.1, Local Inference (Ollama), Zero Data Exfiltration.
 - **Quality Architecture:** TAF Design, Selenium, Playwright, TestNG, Cucumber, Appium, Espresso, RestAssured, Test Pyramid, Shift-Left/Right.
 - **Backend Development:** Java, Kotlin, Python, Spring, Google Guice, Microservices, REST, gRPC, Protobuf, Pub-Sub.
 - **Cloud, Data & CI/CD:** Google Cloud Platform (GCP), Google Spanner, BigQuery, SQL, Oracle, CI/CD Pipelines (Jenkins, Rapid).
 - **Leadership:** Team Leadership, Stakeholder Management, Cross-Functional Collaboration, Technical Presales (RFI/RFP), Crisis Management.
-

PROFESSIONAL EXPERIENCE

EPAM (for Google) | GenAI Quality Architect & Lead SDET | Sep 2022 – Present | Bengaluru

- **Agentic Architecture & Efficiency:** Engineered stateful, multi-agent workflows using Google ADK, LangGraph, and LangChain with custom MCPs and HITL breakpoints, accelerating test creation by 30% and eliminating LLM hallucinations via self-correcting evaluation loops.
- **Hybrid Multi-Model Orchestration:** Designed deployment-agnostic pipelines routing reasoning tasks across Claude 3.7, GPT-4o, and Gemini (Vertex AI), while integrating secure local open-weight models (DeepSeek-R1, Llama 3.1 via Ollama) to guarantee zero data exfiltration for highly sensitive workloads.
- **GenAI-Driven Efficiency:** Deployed custom MCPs (Model Context Protocols) and AI-driven automation frameworks that accelerated test creation by 30% and drastically reduced LLM hallucinations through cyclic, self-correcting agent evaluation loops.
- **Technical Presales (TaaS):** Led the technical engineering efforts for RFI/RFP responses, successfully onboarding five new enterprise projects onto the proprietary TaaS platform. Acted as the core technical SME to demonstrate fault-tolerant workflow orchestration (pause/resume/failure recovery), partnering with product owners who managed the commercial lifecycle.
- **Crisis Management & Leadership:** Spearheaded technical turnaround efforts, successfully resolving a critical project impasse within two weeks by realigning testing architecture and team focus to meet delivery milestones.

EPAM (for Google) | Senior SDET | Sep 2017 – Aug 2022 | Hyderabad

- **Framework Architecture & Scale:** Engineered five custom automation frameworks from scratch encompassing UI, Mobile, API, and Pub-Sub layers, providing robust testing architecture for 10+ Google Supply Chain applications.
- **Test Coverage & Optimization:** Automated over 2000 test cases, elevating overall test coverage to 90%, and slashing regression execution time from 4 days to under 6 hours per release.
- **Shift-Left CI/CD Integration:** Embedded automated test gates directly into Google's CI/CD pipelines (Piper, Rapid), successfully shifting quality left and preventing an average of 5+ critical P0/P1 defects from reaching production each month.

Kiya.ai (for TP ICAP) | SDET | Jan 2016 – Aug 2017 | London

- **Team Leadership:** Led a 5-member QA team from the London client office, driving cross-functional collaboration and managing global stakeholder expectations.
- **Framework Design & Cost Reduction:** Designed a robust Test Automation Framework from the ground up, cutting infrastructure costs by replacing the licensed VeriFix tool and reducing manual workforce dependency by 80%.
- **Test Automation & CI/CD:** Automated 95% of legacy regression tests and integrated the framework seamlessly with Jenkins, minimizing deployment errors and drastically improving release velocity.

Wipro (for Credit Suisse) | Java Backend Developer | Mar 2013 – Dec 2015 | Pune

- **Microservices Development:** Contributed to the transition from monolithic to microservice-based architecture by developing highly scalable Java/Spring RESTful APIs for core banking applications.
- **Production Operations (L2/L3):** Maintained 24/7 stability of global financial systems, performing root cause analysis and rapid incident resolution for critical backend services.

AWARDS & CERTIFICATIONS

- **Top Honors:** Google Project Triumph Champion; "Thank You from Client" Award; EPAM Impact and Best Performer Awards.
- **Recent Certifications:**
 - **Google:** Java & Kotlin Readability.
 - **Anthropic:** Claude Code in Action, Advanced MCP, Claude API & Subagents.
 - **EPAM:** Generative AI, Prompt Engineering, Certified Technical Interviewer.

EDUCATION

- B.Tech in Computer Science and Engineering (CSE): Biju Patnaik University of Technology (BPUT), CGPA: 8.55
