

Ashish Sahu

GenAI/Agentic AI Architect | AI-Driven Engineering | 9 Yrs Google Projects (GCP) | Bengaluru, India

[\(+91\) 9178038828](tel:+919178038828) | ashish38828@zohomail.in | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Yantra - My AI Digital Twin](#)

PROFESSIONAL SUMMARY

GenAI/Agentic AI Architect with 13+ years of experience (9 years leading Google Supply Chain platform integrations), specializing in agentic AI systems, backend engineering and TaaS architectures. Proven track record of transitioning complex enterprise workflows into AI-driven systems using stateful multi-agent architectures, custom MCPs and secure local model deployments. Combines a robust Java/Kotlin backend foundation with leadership of engineering teams to deliver scalable, high-impact AI solutions.

TECHNICAL EXPERTISE

- **GenAI & Agentic AI Systems:** LangGraph, LangChain, LangSmith, Google ADK, Amazon Bedrock AgentCore, EPAM ELITEA, FastMCP, CrewAI, RAG, Vector DBs, Local LLMs (Ollama, vLLM), PyTorch, HITL, Prompt Engineering/Tuning.
 - **AI Safety & Security:** Hallucination mitigation, Evals & Guardrails (RAGAS, LangSmith Evals, LLM-as-a-Judge), Data Privacy (DLP, PII Redaction, RBAC for LLMs), Prompt injection & Jailbreaking.
 - **Languages & Backend:** Java, Kotlin, Python, JavaScript, SQL, FastAPI, gRPC, REST, Pub/Sub, Event-Driven, Protobuf, JSON, EDI, FIX.
 - **Quality Architecture:** TAF Design, Testing Strategies (Test Pyramid, Shift-Left/Right), BDD, Selenium WebDriver, Playwright/Mobilewright MCPs, JUnit, TestNG, RestAssured, HTTPX.
 - **Cloud, DevOps & Data:** GCP (Vertex AI, GCS), AWS (Bedrock, S3), Spanner, BigQuery, Oracle, CI/CD (Rapid, Jenkins, GitHub Actions), Docker, Kubernetes.
 - **Leadership & Delivery:** Technical Presales (RFI/RFP), Stakeholder Management, Cross-Functional Team Leadership, Crisis Management, Agile/Kanban.
-

PROFESSIONAL EXPERIENCE

EPAM (for Google) | GenAI/Agentic AI Architect | Sep 2017 – Present | Bengaluru

AgenticAI Development & Adoption | Jan 2025 – Present | Bengaluru

- **Enterprise GenAI Productization:** Designed a modular suite of AI assistants (Task Planner/Generator, Code Development/Migration/Review Assistants, Test Case & Code Generators, CI/CD Analyzers) adopted across 10+ projects, leveraging an 80/20 core-to-custom architecture to maximize scalability.
- **Multi-Agent & RAG Architecture:** Engineered stateful workflows (LangGraph, Google ADK) and robust RAG pipelines to ground LLM responses, actively suppressing hallucinations and accelerating SDLC workflows by 30%.
- **Platform Transformation via MCPs:** Architecting the evolution of the legacy TaaS platform into an autonomous, agent-driven system by exposing existing enterprise bindings as custom Model Context Protocol (MCP) tools.
- **Zero-Exfiltration AI Infrastructure:** Designed a hybrid LLM routing pipeline that dynamically shifts sensitive workloads from cloud to secure, local open-weight models, guaranteeing strict data privacy.

TaaS Platform Binding Development | Sept 2023 – Dec 2024 | Bengaluru

- **Binding Team Leadership & Crisis Recovery:** Led the engineering team responsible for the TaaS platform's binding ecosystem, delivering 300+ automation bindings (Google Services, SAP, IBM Sterling, Salesforce, Boomi); increased test coverage from 20% to 75%+ and secured exclusive vendor consolidation for EPAM by rescuing the critically stalled integration project within two weeks.
- **Business Growth:** Onboarded 15+ new enterprise projects onto a proprietary TaaS platform by leading engineering efforts for RFI/RFP responses and demonstrating fault-tolerant orchestration (pause/resume/recovery) to stakeholders.

TaaS Platform Development & Automation | July 2021 – Aug 2023 | Hyderabad

- **Core Platform Engineering:** Contributed to the design and development of core gRPC services and Spanner DAOs for the TaaS platform, cutting regression testing time by 80%.
- **Hermetic, Integration & E2E Testing:** Pioneered the TaaS platform hermetic testing stack using TIN and ITS, implementing Test Pyramid and Shift-Left strategies to achieve 95% coverage.

Google Supply Chain & Logistics Automation | Sep 2017 – June 2021 | Hyderabad

- **Logistics Automation Leadership:** Led QA strategy and built proprietary BDD frameworks to automate warehouse inventory (receiving, returns) and device repair workflows, achieving up to 90% coverage.
- **Enterprise Integration & Scale:** Designed comprehensive performance and integration testing architectures to validate high-volume API concurrency, ensuring seamless data synchronization across third-party PLMs, sourcing platforms, and middleware networks.

Kiya.ai (for TP ICAP) | SDET | Jan 2016 – Aug 2017 | London/Pune

- **Engineering Leadership & Cost Optimization:** Led a 5-member global team (London/Pune) to engineer a custom E2E automation framework from scratch. Replaced an expensive licensed tool, cutting operational costs and reducing manual testing dependency by 80%.
- **CI/CD Pipeline Acceleration:** Automated 95% of regression tests for the TP ICAP Trading Platform, integrating execution directly into Jenkins to significantly accelerate release velocity and delivery reliability.

Wipro (for Credit Suisse) | Java Backend Developer | Mar 2013 – Dec 2015 | Pune

- **Microservices Migration:** Engineered scalable Java/Spring Boot RESTful APIs to transition core banking applications from monolith to microservices.
- **Production Support:** Maintained 24/7 stability of global financial systems, performing root cause analysis and L2/L3 incident resolution.

CERTIFICATIONS, AWARDS & EDUCATION

- **GenAI Expertise:** Google Vertex AI Agent Engineering (ADK, MCP & A2A), Anthropic Advanced MCP & Subagents, Claude Code with Bedrock/Vertex AI, EPAM Generative AI & Prompt Engineering.
- **Core Engineering:** Google Java & Kotlin Readability, EPAM Certified Technical Interviewer.
- **Top Honors:** Google Project Triumph Champion, EPAM Impact & Best Performer Awards, "Thank You from Client" Excellence Award.
- **Education:** B.Tech in Computer Science & Engineering | BPUT | CGPA: 8.55
